The aim of these changes is to improve the performance of the sub-fund, offer wider investment opportunities and enhance the possibility to attract new investors.

The denomination of the sub-fund will also be changed to **Coeli SICAV I – High Yield Opportunities** to better reflect the change of its investment policy.

As from the Effective Date, the factsheet of the sub-fund will be updated as follows:

In pursuing this objective, the Investment Manager seeks to invest in sub-investment grade bonds, a majority of which shall be bonds issued in the Nordic region. Sub-investment grade bonds are high yield bonds that either

The Sub-Fund will mainly invest in fixed income securities issued by corporations and financial institutions. On an ancillary basis, the Sub-Fund can also invest into securities issued by governments and their agencies, state and municipal entities. A significant part, or all, of the Sub-Fund's capital may be invested in high yielding sub investment grade (as measured by Standard & Poor's or any equivalent grade of other credit rating agencies) and unrated securities. Up to 10% of the Sub-Fund's net assets may be invested in preferred stocks and other participation rights.

The Sub-Fund may invest, in accordance with Article 43(4) of the 2010 Law, up to 40% of its net assets in covered bonds having a minimum official credit rating of AA- (as measured by Standard & Poor's or any equivalent grade of other credit rating agencies).

The average duration of the Sub-Fund's investments will be actively managed and will not exceed ten years. The residual time maturity of each debt security is limited to twenty years. For securities with a variable interest rate, the next adaptation of the rate replaces the maturity.

The Sub-Fund may invest in assets denominated in any currency. Exposure to non-SEK denominated debt securities may be hedged back into SEK through the use of instruments such as forward foreign exchange contracts. The Sub-Fund will bear the costs incurred by such currency hedging.

Within the limits set forth and as described under Appendix III of the Prospectus, the Sub-Fund is authorised to use financial techniques and derivative instruments to achieve its investment objective and for the purpose of hedging and/or efficient management of the portfolio.

In the event that a debt security's or an issuer's credit rating is downgraded, the credit standing will immediately be assessed and appropriate actions for any specific relevant instrument within the Sub-Fund may be taken. These actions could include selling the underlying holdings or retaining the holdings to maturity depending on the specific characteristics of the instrument; in either event, the decision will be based on what is in the best interest of the shareholders of the Sub-Fund. In case of a rating downgrade of any debt securities that the Sub-Fund may have invested in, the Sub-Fund could be exposed to distressed securities. In this case, the Investment Manager will ensure that this exposure will not exceed 10% of the Sub-Fund's net assets and that the distressed securities are liquidated in the best interests of shareholders.

The Sub-Fund may invest in fixed income markets outside the Nordic region up to 50% of its net assets in order to benefit from sector diversification or to achieve a greater risk/reward ratio.

In addition, the Sub-Fund may invest in other publically traded debt securities (including investment grade bonds), deposits, money market instruments, convertible bonds, UCITS and other UCIs (including ETFs) for liquidity management purposes, as further described below.

In accordance with its investment objective, the Sub-Fund may use financial derivative instruments and structured products to obtain an indirect exposure on fixed income assets that are estimated to be beneficial for its performance and for liquidity management purposes. The Sub-Fund has environmental and/or social characteristics (within the meaning of Article 8 SFDR).
